Success Case

Opencart.com

OpenCart is a free, open-source e-commerce platform designed to help businesses create and manage online stores. Developed using PHP, it supports MySQLi or PostgreSQL databases and offers features such as product management, order processing, and support for multiple languages and currencies. Users can enhance their stores with a wide range of extensions and themes available in the OpenCart marketplace. Additionally, OpenCart provides both community forums and dedicated support options to assist users.

Problem: Finding the right OpenCart extension is difficult, and the CMS lacks clear documentation.

Solution: Agentfy.ai helps users quickly find the best extensions based on their needs and provides real-time guidance for managing OpenCart, making setup and troubleshooting effortless.

Hi, can you help me find tables for the wedding of 100 people

Ai

Certainly! I'd be happy to help you find tables for your wedding of 100 people. Congratulations on your upcoming celebration!

For a wedding of 100 guests, you'll want to consider a mix of table sizes and styles to accommodate your seating arrangements. Here are some options we have available:

1. Round Tables: Our 60" round tables are perfect for seating 8-10 guests comfortably. You might need about 10-12 of these. Link: [60" Round Table]
